Kefli in five slides

A read-it-later app that reads to you.

Save anything

- Share a link from any app on the phone.
- Press the shortcut in the browser.
- The text arrives clean and stays offline.

Read it clean

- One column, your size, your colours.
- Images where the writer put them.
- Your place kept on every device.

Listen to it

- The phone's own voice reads the article aloud.
- Each word lights up as it is spoken.
- It keeps going with the screen locked.

Keep it

- Your library lives under your own key.
- Copies are mirrored away from our servers.
- It outlives the service that saved it.
